

HIGH DENSITY EXTRUDERS

- ◆ Sebright Products -- leading manufacturer of cost effective and efficient "wet" waste handling systems!
- ◆ Hundreds of installations worldwide!
- ◆ Several wet waste or product repackaging applications suitable for the High Density Extruder!
- ◆ Waste volume and weight reductions up to 95%!
- ◆ No waste volume too small or too large!
- ◆ Rugged design with very low maintenance!
- ◆ On-site demonstrations - performance guaranteed!

Wet Waste...

PACKAGE SEPARATIONS AND WET WASTE REDUCTION SOLUTIONS

BEST WET WASTE DISPOSAL COST REDUCTION AND COMPLIANCE CONFORMITY SYSTEM AVAILABLE TODAY

WHAT SOLUTIONS CAN WE PROVIDE?

Guaranteed Performance:

- Liquid Extraction Rates up to 98%
- Volume & Weight Reductions up to 92%

Cost Savings:

- Average 50 - 60%

Return on Investment:

- Average 12-24 Months

Recycling Alternatives:

- Automated vs. Manual Methods

Improved Sanitation:

- Liquid Removal = No Container Leakage

Reduced Environmental Liabilities:

- Liquid Removed Prior to Material Disposal

WHERE CAN YOU FIND US?

- ◆ Anderson-Erickson Dairy
- ◆ Morningstar Dairy
- ◆ Meadow Gold Dairy
- ◆ Flav-O-Rich
- ◆ Dannon
- ◆ Yoplait
- ◆ Sulza Foods
- ◆ Dean Foods

WHY ARE WE CHOSEN?

- ◆ On Site Testing
- ◆ 100% Satisfaction Guaranteed
- ◆ Tailored to Your Application
- ◆ Turn-Key Systems, Service & Support
- ◆ Complete Wet Waste Solutions

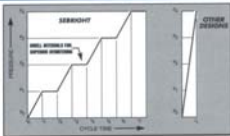

APPLICATIONS

THE SEBRIGHT ADVANTAGE

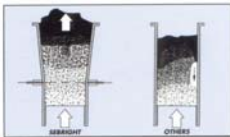

PROGRESSIVE COMPRESSION FOR SUPERIOR DEWATERING

Only Sebright products offers the [patented] benefit of a time interval managed compression cycle. Programmed steps of increasing pressure, combined with pauses as each force level is reached, permit optimum expulsion of liquid from the innermost section of the mass. Other "single stroke" designs are noticeably less efficient.

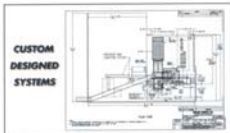

SELF-RELIEVING DISCHARGE

The discharge section of the Sebright High Density Extruder is outwardly flared. This exclusive [patented] benefit allows internal pressure to be gradually dissipated as the "log" of solids approaches the discharge opening, thereby promoting free flow. Jamming problems occur with straight wall designs (at right) when ram pressure cannot overcome high friction forces present along the chamber's inner surfaces.

COMPLETE SYSTEM DESIGN AND INSTALLATION

Sebright Products has been designing, fabricating, installing and servicing waste handling systems since 1964. We can assist with all phases from planning through installation and start-up.

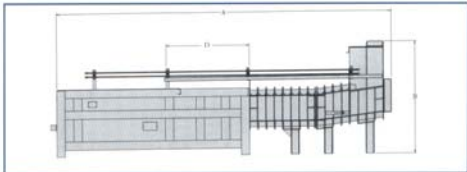

ON-LINE TECHNICAL SUPPORT VIA TELEPHONE MODEM

Users of Sebright Products High Density Extruders have access to on-line factory diagnostic assistance via computer modem hookup. You can speak by telephone with a factory engineer to discuss the operation of your Extruder while he has an on-line screen display of all critical operating parameters transmitted via standard telephone line directly from your machine.
